"Woman Got Culture"

Visit "[Woman Got Culture](#)" on MotoLyrics.com

woman got culture
she speaks like her mother
she wanna know every bit of my past
cause she lookin for the man that will teach her
no part time lover
and she been all around the world
cause that woman got culture, culture, culture
cause that woman got culture, culture, culture

she hangs out with the real cause
mommy knows she would not learn a thing with a thug,
she wanna take some chances see new faces
go to places she has never been before
and i love how she acts around me, shes so curious
she inspires me but i dont want to make my feelings
obvious
i wanna open up my book to her
so she can read about my world (and learn)
and she will never want to leave me

woman got culture
she speaks like her mother
she wanna know every bit of my past
cause she lookin for the man that will teach her
no part time lover
and she been all around the world
cause that woman got culture, culture, culture
cause that woman got culture, culture, culture

see im ready to settle down
even though im way too young to say (to say)
she is the one just enough for me yeah
she just got everything, uh,
from the looks to the mind, cant waste no time
gotta ask that woman out
cause i love how she acts around me
shes so curious
she inspires me but i dont want to make my feelings
obvious
i wanna open up my book to her
so she can read about my world (and learn)

and she will never want to leave me

woman got culture
she speaks like her mother
she wanna know every bit of my past
cause she lookin for the man that will teach her
no part time lover
and she been all around the world..

not to mention those features
she turn no believers to her religion
everybody i know who sees her tells me shes fresh,
fresh
so exciting, shes so exciting to me,
shes fresh shes so fresh
oh, exciting, exciting
shes so exciting to me

woman got culture
she speaks like her mother
she wanna know every bit of my past
cause she lookin for the man that will teach her
no part time lover
and she been all around the world, around the world
yeah, yeah, woman got culture
yeah
