Oh yeah

baby come back to me, remember how it used to be

Paradise is just out of reach

Baby won't you please come back to me

Another night here alone, staring at the telephone

Willing you to make that call, to bring you back where
you belong

It's been threee hard weeks, baby the longest nights

I need to hear your voice and feel your soft skin by my
side

We said things that we shouldn't have

I take back every word

Don't you know I can turn back time

It's only you that I pay the price

Chorus:

Baby come back to me, remember how it used to be

Without you I'm incomplete

I feel the pain with every heartbeat

Baby come back to me, inside I'm dying piece by piece

Paradise is just out of reach

Baby won't you please come back to me

The day that we said goodbye, no holding back the

tears we've cried

Searching for the reasons why, we let this love just
fade and die

All the riches in the world, all the diamonds and the
pearls

I'd give to send the winds of change to bring you back
to me again

Oh say that we can heal this pain, turn the spark into a
flame

I know that we can bring it back again

So baby please can't you see I'm down on my knees

Chorus

Baby, baby, baby....

You're in every, every breath I breathe baby (baby,
baby, baby)

You're in every dream I dream baby (baby, baby, baby)

This time will last forever

Give it all a try, each and every day I pray

Oh girl, yes I pray, please come baby

Chorus
