The land of the free
Home of the brave
Trying to put me in a too early grave
I ain't gonna fight in your stinking war
So go ahead and tear down my door
You can't make me kill another man
You can't make me drop bombs on this land
You can't make me a part of all your killing
My free will just ain't willing
The people of Iraq, they ain't my enemy
the Mesopotamians ain't done nothing to me
I hate this murdering, I hate this stinking war
I ain't gonna be George Bush's whore
You can't make me kill another man
You can't make me drop bombs on this land
You can't make me a part of all your killing
My free will just ain't willing
Get the troops out of Haiti cause poverty ain't no crime
They'll never help themselves if we conquer and divide
What they need is victuals, TV and ESPN
They don't need invading just a friend
You can't make me kill another man
You can't make me drop bombs on this land
You can't make me a part of all your killing
My free will just ain't willing
