"Beyond The System"

Visit "[Beyond The System](#)" on MotoLyrics.com

I think I've left, I live beyond the system now
And I must say commercials, they don't work on me
The truth be known, I've died a couple times before
The side effect, when I can see, how they control

Trust me, come closer, I'll begin to tell you
Somehow, I gained entrance, I've seen things that I
wish I hadn't
What is the difference in knowing and the common
judgment
Drawing from reason, to get a handle on the moment

There's no truth in advertisements
Why [Incomprehensible] judgment
There are many sides to every illusion
Can you draw your own conclusion?

My bed is sinking and all the planets are aligning
What am I thinking, if I had planned it, I'd be lying
Up near the ceiling, I say no, I don't feel like dying
Solace the feeling, when I pretend that it was nothing

I think I've left, I live beyond the system now
And I must say commercials, they don't work on me
The truth be known, I've died a couple times before
The side effect, when I can see, how they control

There's no truth in advertisements
Why [Incomprehensible] judgment
There are many sides to every illusion
Can you draw your own conclusion?
