Your government is lying to you,  
we're not in control of the truth  
Chance? Philosophy? Must be!  
With new eras come new problems,  
as one people we can solve them  
Chance? Philosophy? Must be!  
chorus  
There is so much to say about living today  
(Can you feel it?) The compression of memorable  
events

Somewhere out there people are living nightmares,  
it seems mankind is in entropy  
an we, we can't attain true peace of mind to help  
humanity  
Somewhere out there people are dying and no one  
cares  
It's a true atrocity!  
The seal of our Democracy!
