Your government is lying to you,
We're not in control of the truth
Chance? Philosophy? Must be!
With new eras come new problems,
As one people we can solve them
Chance? Philosophy? Must be!
Chorus
There is so much to say about living today
(Can you feel it?) The compression of memorable
events

Somewhere out there people are living nightmares,
It seems mankind is in entropy
An we, we can't attain true peace of mind to help
humanity
Somewhere out there people are dying and no one
cares
It's a true atrocity!
The seal of our Democracy!
