Ever since you've been gone
Got me wondering baby
Why it's taken me so long
To make you my baby

Now I know we said we weren't gonna rush
I was the first to say it
But I've been thinking about your touch
My mind keeps replaying it

Chorus:
And everything I once stood for
I take it all back for your love
I realize that I want you more
Talking 'bout maybe getting serious

'Cause baby it's time we talked
So that we could just discuss
Where we gonna try and go from here
'Cause baby this here ain't us

Baby what about us?
(Baby what about us?)
We could be just one love'
(We could be just one love')

Baby what about us?
We could be one love, one love
We're lucky just to have just one'

And ever since you left that night
I can't stop thinkin' 'bout cha
Seems like something just ain't right
Spending days without cha

Now I try my best to hold my tongue
But it's time to get indignant
Baby we should just be one
So just say you're with it

Repeat Chorus

Baby I need you
'Cause I adore you
You're the only one I'm kissin' babe
You'll be the only one I'm missing baby

You hold my heart and soul
Making plans, setting dates
Gotta let me know
If I'm the one for you'

'my one and only LOOOOOVVVVEEEE

Baby what about us?
We could be one love, one love
We're lucky just to have just one'

Baby what about us?
We could be one love, one love
We're lucky just to have just one'
