Now and then if you are feeling blue
Think of me as I am thinking of you
If we are apart and your heart grows lonely
I will always be here to hold you closely
I will cherish our moments when we are together
As you light up my life and make it much better
Your smile is warm, it shines so bright
I know what I feel is so right
Your eyes whisper telling me how you feel
I want you to know my feelings are real
These words I say from the bottom of my heart
Remember them always when we are apart.
