(Raul Malo - Al Anderson)

Every night alone every night I spent without you
Every little thing about you runs right through my mind
I wonder where you are and do you ever think about me
And if you get the feeling that there's something
missing too.

But I should know you'll never come back to me
Even though I will always love you I should know.

I'm the one to blame something I did fine without you
Thought I could fool myself and tell me everything's
alright
Every night alone and every night I spent without you
Every little thing about you runs right through my mind.

But I should know you'll never come back to me
Even though I will always love you I should know.

--- Instrumental ---

I should know you'll never come back to me
Even though I will always love you I should
I should know you'll never come back to me
Even though I will always love you I should know...

--- Instrumental to fade ---
