Sat around and check my watch
As i waited for the midnight hour
AND i thought about the things that happend on this
day that we gave some music up..
I started on this journey
I started on this journey

Yet i smile when i think about it
Know i can tlive without it
Laugh I go on about this all the time
Never have i felt this way
Always have i been the same
Here i am infatuated!

Never thought that it would take me this far
WHen i picked up a guitar and learned to play it for the
first time
But here i am here we are
doing what we wanna do
Im freaking enough for us
And i wont mess it up

Yet i smile when i think about it
Know i cant live without it
laugh i go on about this all the time
Never have i felt this way
always will it be the same
here i am infatuated

Smile when i think aboput it
Know i can live without it
laugh i go on about this all the time

never have i felt this way
always will it be the same

Ya i smile when i think about it
know i cant live without it
laugh i go on about this all the time
Here i am infatuated..YA!
