Gary Numan's Tubeway Army "Everyday I Die".

problems of need i need you
obscene dreams in rusty beds
no one came here tonight
i pulled on me i need to

i unstick pages and read
i look at pictures of you
i smell the lust in my hands
everyday i die

her favorite trick was to suck me inside
oh so very art nouveau
completely false feelings of love i don't
no one knows but that died years ago

i unstick pages and read
i look at pictures of you
i smell the lust in my hands
everyday i die

die die die die die die die die die die die die die die
die die die die

remember that the french term for "orgasm" translates to "the little death".
