"A Vision"

Visit "[A Vision](#)" on MotoLyrics.com

You can lie to me
If you promise to always believe me
When I lie to you
We'll go round and round
Yeah That's what we'll do.

Here we are again
The closest thing I have
To a friend
Heard it all before
Round and round
And round some more.

I had a vision and all was right
I had a vision and all was true
You said I hope that you see the light
I said I hope that you see it too.

Don't look me in the eye
And I will try to act surprised.
Say it's a brand new day
It's the oldest lie since lies were first made.

Now I've got a pill
And it helps me
Up that hill
Looking down on me
Looking down
Liking what I see.

I had a vision and all was right
I had a vision and all was true
You said I hope that you see the light
I said I hope that you see it too.

Day after day
We hope and we pray
That something will come
And change our ways
