Yeah, I wish that you had told me you had an
appointment with your doctor at 4am
cause its safe to assume you lept out of my room
through the window for some important obligation
and not cause you're weird.
Yeah, I wish that you had told me that your dad gets up
at 4am
and if I wanted to leave it would be out through the
window
and yeah I wanted to leave
but I didnt want it to be me breaking up in your car on
the way to my birthday.
Would you believe I'm back.
They built your house on a cul-de-sac.
They built my brain outta beans and my heart outta
nothing.
