Open the window and sun pours in  
Morning breeze blows across my skin  
Can't help smiling at the thought of you  
Feels like a dream but I know it's true

In a crazy world full of ups and downs  
You're beside me come what may  
No matter what life brings  
Long as you're with me  
Everything's going my way

Sip my coffee and I watch the clock  
Dance down the hallway to the parking lot  
Drive back home to the reason I breathe  
Cash in the kisses that you save for

In a crazy world full of ups and downs  
You're beside me come what may  
No matter what life brings  
Long as you're with me  
Everything's going my way

Layin' with you baby in the lazy-chair  
Softly remind you just how much I care  
Settle in for a real good night  
Count my blessings then I hit the light

In a crazy world full of ups and downs  
You're beside me come what may  
No matter what life brings  
Long as you're with me  
Everything's going my way  
Everything's going my way  
Everything's going my way, yea
