Keep on moving

Every time you smile  
The light you shine lights up the sky  
You carry the wings of a butterfly  
You know you got to keep moving

Baby when you dance  
You hold the world in super trance  
The feeling you give is of fine romance  
You know you got to keep moving

Baby you are so divine  
Leave the rest so far behind  
All the world is watching you  
So don't you ever change your mind  
And you have to promise yourself  
To keep on moving

Every time you doubt  
What all the fuss is all about  
Remember that it will all work out  
If only you keep on moving

Baby you are so divine  
Leave the rest so far behind  
All the world is watching you  
So don't you ever change your mind  
And you have to promise yourself  
To keep on moving

Baby you have got to see  
All you ever want to be  
The answer is inside of you  
Perseverance is the key  
And you have to promise yourself  
To keep on moving

So I got to keep moving  
So I got to get down  
So I got to keep moving

So I got to get down  
So I got to keep moving  
So I got to get down  
So I got to keep moving  
So I got to get down

You're so special, vibe was never the same  
Keep it right up, you're head over game

Baby you are so divine  
Leave the rest so far behind  
All the world is watching you  
So don't you ever change your mind  
And you have to promise yourself  
To keep on moving

Baby you have got to see  
All you ever want to be  
The answer is inside of you  
Perseverance is the key  
And you have to promise yourself  
To keep on moving
