I've been there

1.Verse:

You made your first impression
As you squeezed into the door
Stepped through the elevator
Catch your eyes walk in staring at the floor
You didn't even notice me
But you were stepping on my foot
And when you said you're sorry
You gave me that unfamiliar look

Bridge:

You gotta be strong
You gotta be smart
Never let on
You think it's too hard
Baby if you feel you're all alone
I know somewhere you can go

Chorus:

When your world falls down and you're giving up
When you lost yourself and you're out of touch
When the world has turned its back on you
And no one stands up for you through it
If it's all gone falling down
With no one else around
It's ok baby don't be scared
Cuz I know
Baby I've been there
Baby I've been there

2.Verse:

You packed your bags up so much
Now you left it all behind
You lost your sense of love
Somebody once treated you unkind
We both know the story
Yeah we've read it through and through
So if you don't know what to do
I'm right here ready for you

Bridge 2:

You gotta be tough
When you feel lost
It's never too much
Just give all you've got
So if you can't give you're all to me
I can't be the one you need

Chorus:

When your world falls down and you're giving up
When you lost yourself and you're out of touch
When the world has turned its back on you
And no one stands up for you through it
If it's all gone falling down
With no one else around
It's ok baby don't be scared
Cuz I know
Baby I've been there
Baby I've been there

Keep it rolling girl, keep it rolling girl
And then you think about it's something I've been
through.

I won't put you through what he did
I'm not even scared of what you need
You could be the one I've waited for

If it's all gone falling down
With no one else around
It's ok baby don't be scared
Cuz I know
Baby I've been there
Baby I've been there

Chorus:

When your world falls down and you're giving up
When you lost yourself and you're out of touch
When the world has turned its back on you
And no one stands up for you through it
If it's all gone falling down
With no one else around
It's ok baby don't be scared
Cuz I know
Baby I've been there
Baby I've been there
