Used to be afraid of the government  
Now I'm just afraid of ignorance  
I guess to me it makes no sense  
That we teach hate instead of tolerance

Watching as people destroy their homes  
Watching kids raise themselves all alone  
We all wish that the war was won  
But we're fighting this war through the barrel of a gun

This is the end  
This is the end

Now all I see is that this violence  
It's just leading to the apocalypse  
It seems that now we're driven by greed  
And we're still gnawing on the hand that feeds

What I see now it makes me sick  
This is the life you're given not the life you pick  
We all wish that this will end  
Before we're killing people that we called friends

This is the End  
This is the End

This is the way the world ends  
This is the way the world ends  
Guns, bombs, you decide  
Our whole lives are suicide
