You can fool a lot of the people but you don't fool me
You think that you're a big deal your just a wanna be
You Ain't doing nothing that we Ain't already done

Its not the real thing that your pushing sooner or later
your gonna get caught
It takes more to get their blood rushing then all the
fashion you ever bought
They'll see through you they ain't so dumb

Chorus

You ain't right fucker you ain't right
You aint' right fucker you ain't right
You ain't right fucker you ain't right
You ain't right and you'll never be

Your gonna start a revolution (yea) in your wet dreams
You're at the wrong end of its evolution you'll never get
what it means
Psycho's what your not what it takes you ain't got

(Chorus)

You wont like it when you hear this well what you gonna
do
Any one who really knows it is gonna know its true
Enjoy it while you can its gonna end in tears

Bridge

You don't push it forward you just hold it back
Your not one of the good ones your on a metal track

(Chorus)
