Girl I feel like we've been through it
Just remember everything I say
You're still here and I'm still here
So don't worry no longer Coz we're getting stronger

Don't make things so complicated
Analysing every single move
Firing questions by my intentions
All I will say is I love ya
And you should know that?

I wanna make you smile
Make the sun shine baby
Never leave your side
But if you don't believe me
After all I've said and done
Guess you will never know
If that's the way it goes

Rise above the others baby
Don't believe a single word they say
They're just jealous so envious
Waiting for something but getting nothing

Don't get hung up
Expectations rarely ever seem to go to plan
Asking you to burn the issue
Drop it, forget it, just ride it
Coz you should know that?

I wanna make you smile
Make the sun shine baby
Never leave your side
But if you don't believe me
After all I've said and done
Guess you will never know
If that's the way it goes

I need ya
You know that I've already told ya
A million times I adore ya

My heart is on the line yeah
Well what can I do?
Other than dedicate it all to you
There's no way I'm changing
No hearts will be breaking
So all I will say is I love ya
And let you know that?

I wanna make you smile
Make the sun shine baby
Never leave your side
But if you don't believe me
After all I said and done
Guess you will never know
That's the way it goes baby

I wanna make you smile
Make the sun shine baby
No I'll never leave your side
But if you don't believe me
After all I said and done
Guess you will never know
You will never know
If that's the way it goes
Oh yeah
That's the way it goes
Yeah
That's the way it goes
