(feat. A+)

[Opio]

Pull over to the right I hear them sirens blarin  
50 flyin down the avenue like the Red Baron  
Chasin after cousin in the white Xterra  
He crashed into a semi, that jackknifed when he veered  
left  
It appears the grim reaper at his doorstep  
Then he looked me dead in my eyes and said "you're  
next"  
Musta cut like a scalpel and forceps  
The smell of brimstone in the air it was a warning

[A-Plus]

Never speak at a sucker with a weak bladder  
Like they ain't even real, I see past them weak bastards  
Run for cover police blastin  
Homies had to carry you out like he's had it  
Soft as bean salad, like you havin lunch  
with Michael Jackson up in his psycho mansion  
When the bible spin I'm fin' to begin, my final action  
Then I find woman willin to sin, for my attraction  
We the live brothers livin to win, we flyin past 'em  
I'm Adam, first man, chillin with my fly madam

[Opio]

O-P-I-O, I see the psychopath  
Actin black to anglo-saxon, we read 'em like Maxim

[Chorus: x2]

(Keep your eyes peeled) keep your boots laced  
(Keep your mouth shut) fake niggaz keep a new face  
(Keep your fingers crossed) keep the pot boilin  
(Keep the ball rollin) Hiero crew, yeah

[Opio]

I'm comin like a cup of dreal[?]  
I drop a C-note on the crap table, hit the hard ace  
so easily you weak as a parakeet, knees in you petty  
Smoke blowin like confetti, knock 'em out like Freddie

Foxxx

It's the green leaf, potent like Puerto Rican pussy  
Can't go more than a week, it might push me to the  
edge

Give me the brownie, or the cookie

Now the space dank, I'm no rookie

I got the seed in my fingernails and my follicles

Forensic science, like the finest desert weed heads

But I need bread, more head, it's triangulation

My favorite station KHRO

We made our dough, independently, fuck the industry

We bang tremendously, slingin on the internet

We quick with the tongue like Felix Trinidad, with the  
knuckle sandwich

Why pick up a gun, just use your damn fists (like this)

[Chorus 1/2]
