I'm starting the test  
Your unbelief  
Conquering emperor  
Woke up your brain  
Restless thoughts  
Still consuming your mind  
You help my magic  
With your own horrible frights  
Words of wreck  
Rest in your head  
Triumph over you  
The self-cremation  
Death - the door, you near with every day to  
The way shall save your soul  
Close the past of life  
Cross the still of fear! you shall be free  
Anxious eyes  
Opened in fear  
Pulsation of blood  
Inside the bowels  
Something cold  
Touching twisted veins  
Never-ending bloody stream...  
Scarley waves carry you away  
Across the Style into resting place  
Hear my voice, my words of your destiny  
Nick your shell and fly towards me!  
Rest - under my wings  
Com - in my arms  
Give me your life - set free your lunatic soul  
Frosty edge  
Penetrate again  
Cuts in rage  
You choose the only way  
Approach my son  
Give me your hand  
Forget yourself  
Leave all behind! you're mine!
