I see danger, danger, danger

Around the corner

Sent by me

Shadows the ways

Straight away you ran from me

I heard you calling

Yes, I heard you calling

I heard you calling

Yes, I heard you calling

I hear silence

I hear silence in my heart

From the distance

Turn your back and run from me

Heard you calling

Yes, I heard you calling

Heard you calling

Yes, I heard you calling

When it happens

You will be no friend of mine

Take the first chance

When I am no longer free

I heard you calling Yes, I heard you calling Heard you calling Yes, I heard you calling In the future When you want me in your heart I won't be there If you call out in the dark Heard you calling Yes, I heard you calling Heard you calling Yes, I heard you, heard you, heard you calling Can you hear me deep inside From these feelings I can't hide Can you hear me deep inside From these feelings I can't hide Oh, can you hear me deep inside From these feelings i can't hide Can you hear me calling you Can you hear me calling you Can you hear me calling you Can you head me calling you
