(In memory of John Whiteside Parsons (1914-1952) and his "Babalon Working")  
(lyrics by Pavel Wasilewski)

"John Whiteside Parsons (1914-1952) - a brilliant rocket fuel scientist  
And one of the oddest disciples of A. Crowley, the Beast 666. Obsessed  
By the vision of Whore Goddess BABALON, he was engaged in very complex  
Practices to incarnate Her imanation in a woman's body. The action was  
Dissaproved by Crowley and, as some occultists argue, the dangerous  
Rites Parsons performed resulted in his violent death in a home  
Explosion. For his NASA contribution one of the Moon's dark side  
Craters was named after him."

Mammary vow to the pleasure hunt  
She gladly accepts in semen streams  
Life-drenching vaginal penetralia  
Her Tokens of Loves are never defied

Drunken with the filth of the purest Desire  
Obedient She spreads the legs truly wide  
For "Isis In Welcome" is the proper posture  
Yet Lady of Command She always is

Human apes, all what's to despise  
Too blind to see through Her Writ  
Erect phalloi salute Her Glory  
Of Fire-Hole astride the Beast

Slimy verses of wild-pounding gore  
Is what She writes with the holiest Pean  
All left for Her is just to take  
One little step into your world
