Right!

A scarab beetle
Which toils through it's phases
From an egg to a larva to protector of the dawning sun
Out of the Unmanifest into the Matrix of Manifestation
One word which opens the gates to the worlds

Knowledge not information grants transformative
power
There are as many left hand paths as their are us-stars
The extension of existence to a further level of being
By powers of the Set that releases from the thrall

I have come into being
I have come into being

Meaning can come only from the individual

In the moments of divine clairvoyance and
intensification of being
The utterance of the word which ripples through the
fabric of the worlds
And gives insight and strength to those who want to
become

I have come into being
I have come into being

Xeper...
Xepera...
Xeperu...

A scarab beetle
Which toils through it's phases
From an egg to a larva to protector of the dawning sun
Out of the unmanifest into the Matrix of Manifestation
One word which opens the gates to realities

I have come into being
