"Fire On The Waters"

Visit "[Fire On The Waters](#)" on [MotoLyrics.com](#)

Smoke in the universe
Will make explode the earth
We don't want power plants
No nukes are in demand.

There will be thunder and lightning
Across the sparkling sky.
Don't leave our children to dreadful despair
Won't hear them crying.

Fire on the water
Fire on the water
Fire on the water
Is money-making daughter
Fire on the water
fire on the water
Is money-making daughter
Fire on the water

Radioactive waste
Can't disappear to space.
Just one atomic ray
Can blow it all away.

As Nostradamus once told us
There will be fear in our days.
But energy is a profit affair
So they don't care for...

Fire on the water
...

We've gotta save our nature.
Stop now destroying the sky
'Cause evolution is killing the air.
Now we're afraid of...

Fire on the water
...
