Step into the light of the day
Well you got burned baby
You better run run away
What are you gonna do when the fingers point at you
What are you gonna do when the fingers point at you
I got a shoulder to cry on
I got a shoulder to cry on
And in your darkest,darkest nights of love
You confess to me
You confide in me
Go on and breakdown
Go on and breakdown
When all the fingers points at you
Step into a little bit of love
It's rainin' down baby
You'd better leave before you drown
What are you gonna do when the fingers point at you
What are you gonna do when the fingers point at you
I got a shoulder to cry on
I got a shoulder to cry on
And in your darkest,darkest nights of love
You confess to me
You confide in me
Go on and breakdown
Go on and breakdown
When all the fingers points at you
Breakdown
Breakdown...
(solo-Jamie)
What are you gonna do when the fingers point at you
I got a shoulder to cry on
I got a shoulder to cry on
And in your darkest,darkest nights of love
You confess to me
You confide in me
(solo-Davy)
