"These New Knights"

Visit "[These New Knights](#)" on MotoLyrics.com

I'm trusting in you not tell a tale
You guard this as you guard the grail
It's rusting the edges round
Important folks can save the town
But nothing
But nothing's going on
The people stand and sit and yawn

We're knights
We're mighty cold and don't like
The kinds of things you might
The kinds of thing you might

And I
I lead the pack of our kind
We're leaving you people behind
We're leaving you people behind

So
Step outside we're almost over
These new knights they hardly know her
Beaten down now they just can't see
All the thoughts I've taken with me
All the thoughts I've taken with me
Of you

I'm chasing all the cities round
I'm searching after trouble ground
And rushing to the private hold
And all the paintings have been sold
I bother
I bother or lament
A crippled cop would call them bent
Their posture
Beaten by repent

We're knights
We're mighty cold and don't like
The kinds of things you might
The kinds of things you might

And I
I lead the pack of our kind
We're leaving you people behind
We're leaving you people behind

So
Step outside we're almost over
These new knights they hardly know her
Beaten down now they just can't see
All the thoughts I've taken with me
Step outside we're almost over
These new knights they hardly know her
Beaten down now they just can't see
All the thoughts I've taken with me
All the thoughts I've taken with me
Of you

You came along
Expression torn
I read your eyes and realise
The war between us has gone
It's getting cold
I hear a sound
I see your face
And I'll be falling down to the ground

So
Step outside we're almost over
These new knights they hardly know her
Beaten down now they just can't see
All the thoughts I've taken with me
Step outside we're almost over
These new knights they hardly know her
Beaten down now they just can't see
All the thoughts I've taken with me
All the thoughts I've taken with me
Of you
