He took the wrong direction  
Under the purple pink sky  
Just like a video set  
He's just a video guy

My brother needs protection  
He says he's ready to feel  
But something doesn't seem right  
Something doesn't seem real

Like a video game [x8]

I'm on my way to find him now  
Through a fortress of flames  
He's sayin' all the right words  
And dropin' all the right names

I really need to reach him now  
Make him understand  
It's just a video show  
In a video land

Like a video game [x8]

He's passed through all the levels here  
A-drawn water from stone  
Not every member he needs  
On his cellular phone

He takes me to the mirror now  
But oh what do you see  
It's just a video girl  
It's just a video me

Like a video game [x4]
