

Microphones, The "Monsters"

Visit "[Monsters](#)" on MotoLyrics.com

high pitch treble monster
floating in the air digging in my ears
low pitch bass monster
hiding in the back
corner of the room hes in its all black,
high pitch treble monster
hit my eyes
pokes my eyes
low pitch bass monster
telling me what to do,
i cant see him but hes tellin me what to do
high pitch treble monster
lives in the woods
spins around and cuts trees down
in the woods
low pitch bass monster
lives in a rotten stump
only comes out dark at night
telling me what to do
high pitch treble monster
lives in puke
stings my tummy in my eye
pokes me with needles too
low pitch bass monster
lives inside the books
no body really knows exactly how he looks
high pitch treble monster
right infront of my face
poking me with needles and winning every race,
low pitch bass monster
is going pretty slow big like a bomb,low
high pitch treble monster
digs in everyones ears feeds off everyones fears.

different shape sound waves went ALL AROUND.
