Born from the sky  
we are born to this land  
from a dream so far away  
I was sent to your heart  
with the stars shining  
we are asked to live as one love  
never forget, this is  
Trust me to be singlet  
we will sing on the days  
when each voice will be a witness,  
each will sing every way  
There'll be no more empty promises  
we are turning an special page of life  
I will be the one to hold you  
in this everlasting dance of love  
Hold me now forever  
I can remember when  
you an I came through the winter  
now it's summer again.  
Be mine, be my love, be my guide  
together will be as one love  
you can count on my life.  
Born from the sky la,la,la,la,la  
Words of discouragement dissappear  
in your clear eyes  
Never change, never doubt  
what you mean to my life.
