So won't you even try to understand my thinking
I know it's not been easy, I am gone more than I
want to - it's the job
You wonder where I go, Especially in the evenings, they
are so long
And I know I cannot sit there all alone

Chorus

So don't you want to ask me, Right now, always,
now and through forever
If I love you, Will I be beside you in my heart and in my
soul
Or will I ever, ever leave you - all alone
So don't you want an answer, Right now, always,
now and through forever
Yes, I love you, I will be beside you in my heart and in
my soul
And I will never, ever leave you

Verse

So try to understand the time spent with my cohorts
Temptation's all around me and I know I must
sustain good company, or beware
So hold me in your arms, I never will deceive you, You
are my world
And my only aim's to keep you safe and warm

Chorus

And I will never, ever leave you - all alone

Bridge

Believe in me and you will see
So won't you even try to understand my thinking, I
know it's not been easy

Chorus

And I will never, ever leave you - all alone
