1 verse:

See my face in the mirror
Asking me questions
What have I done?
How come I'm down at point zero
Only dreams of tomorrow left in my hands
I see the lights going down
There's no-one around
Is heaven watching over me?

Chorus:

Cos here I'm waiting for a falling star
And I am wishing for the dawn to come
To make a new start
Out of the dark
My falling star...

2.verse:

Time and space disappearing
But I keep on hearing your voice in my head
Telling me who to be
But you never believed in me

Bridge:

Why did i waste my time on you?
(You) should have known better not to break the rules
Now that you're gone
I'm finally free to breathe
