City of desolation why are you here why did you come,  
where are you goin'.  
City of desolation feel your wind blow through my hair,  
and I wonder.

City of desolation feel your own heart.  
City of desolation the right place to start.

Never saw you comin', felt a cold wind searching my  
brains, and I was gone.  
Talk to me I'm the nomad living for you what what do I  
get, in return.

City of desolation feel your own heart.  
City of desolation the right place to start.
