"New Horizon"

Visit "[New Horizon](#)" on MotoLyrics.com

I can feel your heart beat a little faster
I can see your eyes shine a little brighter
I feel time sweep away just holding you close
You reveal my inner self as I'm lost with these words

This is a whole new feeling

We have found a new horizon
Following the voice of two hearts
We will face the new horizon
Never shall we be apart

Seems so unreal how the pieces fall together
When time disappears to become forever
All the moments that we share is all that I need
Inside my mind you're the only one for me

This is a whole new feeling

We have found a new horizon
Following the voice of two hearts
We will face the new horizon
Never shall we be apart

We could hold on to our hearts and leave this be
But if you deny this it's all meaningless to me

This is a whole new feeling

We have found a new horizon
Following the voice of two hearts
We will face the new horizon
Never shall we be apart
