After all these years  
After all this time  
I'm still holding you here  
Deep in this heart of mine  
More than a memory  
You mean everything in the world to me  
Through the sun and the rain  
Here in my life you remain  
After all these years

Through my hard times and trouble  
You would come running on the double  
Standing by my side  
Bringing tears of joy to my eyes  
After all these years  
After all this time  
Through the pain and the tears  
We hold a flame that never die  
After all these years

I heard it said we could never get back  
That we had fallen off the track  
But time would prove that we knew better  
We could work it out and bring it all together  
After all these years

After all these years  
After all this time  
Every hour of every day  
You're always here on my mind  
More than a memory  
You mean everything in the world to me  
Through the sun and the rain  
Here in my life you remain  
After all these years
