we sit we wait
we don't thank god things are wrong and why should
we anyway
we're so young we're made to be broken then
assembled outspoken
always closing what's better left open

i sit i wait
i don't think i've done wrong until you look at me that
way
well wrong impressions lead to wrong confessions
which then led into the wrong direction
now i'm so lost will i ever hit ground today

don't touch me
no i don't like when you make me feel like a little child
just hear me
as well i don't like being grown up all the time
so what i feel like crying
i feel like lying down
i feel like i'm dying
inside
well i guess that's life

so i'd rather sit here and wait
don't tell me to get a job cause i don't have to now
where i will have to one day
now is my time it's our time gonna enjoy it while it lasts
cause once this all ends i will have nothing more than
to think about the past

don't touch me
no i don't like when you make me feel like a little child
just hear me
as well i don't like being grown up all the time
so what i feel like crying
i feel like lying down
i feel like i'm dying
inside
well i guess that's life

i don't think i can be anything that you'd expect me to
be
i don't want to i don't need to i can't be you only feel
you
well i don't want to and i don't need you... now

no i don't like when you make me feel like a little child
just hear me
as well i don't like being grown up all the time
so what i feel like crying
i feel like lying down
i feel like i'm dying
inside
well i guess that's life

so what i feel like crying
i feel like lying down
i feel like i'm dying
inside
well i guess that's life

oh how i love my life
