Glitterbug, with your mind everywhere  
I'm anywhere you want me to be  
Take your time but take care  
For in the end we're all history

Don't be shy, let everyone or me at least inside  
You'll be fine, you'll be fine in the morning sunshine  
Fine, you will find if you're mine, you might be free  
We shall see

Glitterbug, with your eyes through the gray  
There's something that I need you to say  
Could be high, go away  
Or anything that makes it okay

From the ground you are the only star that shines  
tonight  
If you go you must know that you'll shine forever  
Come if you're mine, you will shine eternally  
Wait and see

From the bar to the stars  
Through the haze of a thousand wasted days  
You must be tired, you've burned so bright  
So goodnight, goodnight Glitterbug
