

Mo, The "All The Time"

Visit "[All The Time](#)" on MotoLyrics.com

Staring at the rain
I lost my day today
'cause I forgot to look away
Happens all the time what can I say
Day my day my day...

I'm lost in a town
with all my thoughts spread around
A thousand signs I couldn't figure out
Happens all the time what's that about
Round and round and round...

When I fall in
Then I feel out day after day
I hate you
I light them up
I'm burning down night after night
But I love you
Running from slow
Motion too fast year after year
I hate you
Looking for high
Lights in the low all of my life

Friendly conversation
Sharing their sensation
but I had only music in my head
Happens all the time what can I say
Na nana nana...

Club night lot's of drinking
Boys and girls dancing
while I just struggle not to fall
Happens all the time what's that about
Oh, what's that about?

When I fall in
Then I feel out day after day
I hate you
I light them up
I'm burning down night after night

But I love you
Running from slow
Motion too fast year after year
I hate you
Looking for high
Lights in the low all of my life
But I love you

When I fall in
Then I feel out day after day
I hate you
I light them up
I'm burning down night after night
But I love you
Running from slow
Motion too fast year after year
I hate you
Looking for high
Lights in the low all of my life
But I love you

When I fall in
Then I feel out day after day
I light them up
I'm burning down night after night
Running from slow
Motion too fast year after year
Looking for high
Lights in the low all of my life

When I fall in
Then I feel out day after day
I light them up
I'm burning down night after night
Running from slow
Motion too fast year after year
Looking for high
Lights in the low all of my life
