### "One Life One Love"

Visit "[One Life One Love](#)" on [MotoLyrics.com](http://MotoLyrics.com)

(Chorus)

Energy that we exchange is imperative  
Intricate so simple  
Life is the spirit and the body is the temple  
One Life One Love  
Tell me this are you prepared to live  
Energy that we exchange is imperative  
Intricate so simple  
Life is the spirit and the body is the temple  
One Life One Love

[Casual]

All they seen was one hand bust through the white  
sand  
Illuminating the land with liberation  
And mysterious, ferociously, serious black man  
Experience the urban warfare of fully strapped assault  
As an angel hoping my benevolence will change you  
Singing folklore of the poor  
Natural born warrior  
Since the days of Spain was ruled by the Moors  
Then again, before your existence  
Imhotep  
The presenter of the mystics  
Geometry, trigonometry statistics  
It's simplitics embedded in my bloodline  
Just like the pain of my forefathers  
The chains of slavery remains  
Behaviors we obtained in days that we were slain  
and tortured  
Tormented and scorned  
Shackles on my feet, feeding me pork  
Lashes on my back, lost my family  
Not to belittle the middle passage calamity  
I gotta make decisions  
Cause I keep havin' visions of flight bombing politicians  
On some midnight marauder missions  
It gets harder  
They shut down your energy, cut off your water  
Close the gas station, food supply shortened

Dying of starvation and smoke ventilation  
I'm coming realer than you fairytale killers  
We disciplined, that's why no militias can get with us  
Sure, shot hit us from a thousand meters away  
All day

[DeI]

Tomorrow, what you gonna do?  
Your past is haunting you  
You know what, I'ma tell as I'm sipping on this brew  
You know it's wrong and true  
So what you gonna do?  
The truth is long overdue 2X

[Tajai]

I'm talking bout  
Demolitions, ammunition  
No more propositions or petitions  
Seditions met with lynchings and whippings  
But they won't crush my wishes into submission  
Foresight courtesy of 3rd Eye Vision  
Tells me hit 'em  
Get 'em before they first force strike  
Meet in the black of the night  
Dodging ghetto pterodactyl lights  
Bring the full gats and precious metals if you true dat  
Get wise with medical supplies  
Conceptualize and plan  
Or get caught with your ass wide open  
And not get to ask  
"Why", I'm hoping you hear  
And I'm hoping your here  
For the millenium season opener  
I keep ample degrees up my sleeve  
For brothers who no longer breathe  
No reprieves  
Nothing but memories to retrieve  
Black babies disease  
Stomachs distended, arms out stretched  
For any care extended  
This is the flock to which I am attended  
But I'll do it  
I'm committed, commending  
All commandants vowing to be uncommon  
Fuck the promenade  
Underground and granite-strong, granted  
The path is jagged and long  
And we look raggied  
But I want more than this wall at my back in days  
Back we would have been mobile  
It's time to make power moves

And put the all in all-powerful, all in all  
I can't close my eyes  
And I would be a coward too  
And so would you, so sir  
Are you scared?, no sir  
I see answers to irradiate  
Eradicate this cancer  
They won't catch me playing patty cake with hands up  
You might catch me spraying  
But I think you better get them flight masks up

[Voice]

I'm ready

[Pep Love]

Yeah, ah huh  
One Life One Love  
Tell me this are you prepared to live?

(Chorus)

[Voice]

I'm ready  
I'm ready
