All things just keep getting better

You came into my life
And my world never looked so bright, yeah
It's true, you bring out the best in me
And now I can clearly see

Days keep getting better, nights keep getting better
Days keep getting better, nights keep getting better
It's true, it's true, it's true, true, true

When you are around, when you are around
All things just keep getting better
When you are around, when you are around
All things just keep getting better

See it's more than one day
That you'll be right here beside me
It's you and all of the things you do
That makes everything alright

'Cause days keep getting better, nights keep getting better
Days keep getting better, nights keep getting better
It's true, it's true, it's true, it's true
It's true, true, true, true, true, true

When you are around, when you are around
All things just keep getting better
When you are around, when you are around
All things just keep getting better

When we are together baby, oh yeah
Things keep getting better
Better baby, better baby
When we are together baby, together baby
Things keep getting better baby, better baby
When we are together

When you are around, when you are around
All things just keep getting better

When you are around, when you are around
All things just keep getting better

All things, all things, all things just keep getting better
All things, all things, all things just keep getting better
All things just keep getting better
