"Bring on the Lucie"

Visit "[Bring on the Lucie](#)" on MotoLyrics.com

We don't care what flag you're waving
We don't even want to know your name
We don't care where you're from or where you're going
All we know is that you came
You're making all our decisions
We have just one request of you
That while you're thinking things over
Here's something you just better do

Free the people now
Do it do it do it now

Well we were caught with our hands in the air
Don't despair paranoia is everywhere
We can shake it with love when we're scared
So let's shout it aloud like a prayer

We understand your paranoia
But we don't want to play your game
You think you're cool and know what you are doing
666 is your name
So while you're jerking off each other
You better bear this thought in mind
Your time is up you better know it
But maybe you don't read the signs

Well you were caught with your hands in the kill
And you still got to swallow your pill
As you slip and you slide down the hill
On the blood of the people you killed

Stop the killing now
Do it do it do it now
Bring on the Lucie
