Windows down as the night blows in
Tap the beat on the wheel as the tires spin
Until we're there crank the radio
We'll join in with the songs we know

Hey, everything's right, said everything's right tonight
Hey, everything's right, said everything's right tonight

Smiles light up as we walk in
Old conversations begin again
Nostalgia's thick as the August air
It takes us back to a time when we didn't care, we
didn't care

Hey, everything's right, said everything's right tonight
Hey, everything's right, said everything's right tonight

Oh, everything's right, said everything's right tonight
Hey, everything's right, said everything's right tonight
Hey, everything's right, said everything's right tonight
Hey, everything's right, said everything's right tonight
Hey, everything's right, said everything's right tonight

Everything's right...
