We haven't met
And that's ok
'cause you will be askin' for me one day
Don't wanna wait
In line
The moment is mine believe me

Don't close your eyes
'cause it's a chance worth taking
There's nothing that I can't shake you

I know where I stand
I know who I am
I would never run away when life gets bad it's
Everything I see
Every part of me
Gonna get what I deserve
I've got nerve

Electrified I'm on a wire
We're getting together and we're on fire
What I said you heard
Now I've got you spinnin'
Don't close your mind
The words to you are open
And I think that I can show you

I know where I stand
I know who I am
I would never run away when life gets bad it's
Everything I see
Every part of me
I know I can change the world yeah, yeah, yeah

I know what you like
I know what you think
Not afraid to stare you down until you blink
It's Everything I see
Every part of me
Don't I get what I deserve
I've got nerve

You, yeah, need to discover
Who makes you feel free
I need you to uncover the part of you that's reaching
out for me, yeah

I know where I stand
I know who I am
I would never run away when life gets bad it's

Everything I see
Every part of me
I know I can change the world
I know what you like
I know what you think
I'm not afraid to stare you down until you blink it's

Everything I see
Every part of me
Gonna get what I deserve
Yeah, I got nerve
I know what you like
I know what you think
I'm not afraid to stare you down until you blink it's

Everything I see
Every part of me
Gonna get what I deserve
(I've got)
I got nerve
