Hi, sorry to call so late, I just - I was missin you and I
just wanted to talk... maybe we can talk tomorrow

Make up your mind, don't you want me like I - I wanna
feel that - touch that hunts me every night - it felt so
right

I just want you, you know I... I just want you (there's no
hiding), I just want you, do you want me?

So far away (so far away), another night alone, another
day (another day), another telephone call...

But one day, I'm gonna find a way to make you stay in
my arms -[unknown] - your the one

I just want you (there's no denying), I just want you
(there's no hiding), I just want you, do you want me?

Gotta feeling that it's time to make a change, gotta
feeling that things can't stay the same, I feel my heart
loosing control

(Wooo ooo - don't you want me too?)

I just want you, you know I... I just want you, I just want
you, do you want me?

I just want you (ooo I just want you baby), I just want you
(don't you want me too?), I just want you, do you want
me?

I just want you (I just want you baby), I just want you,
don't you want me too? I just want you, do you want
me?

Well sorry to call so late. I was just missing you
