[Featuring Angela McCluskey]

Sit Still

And close your eyes  
What's behind the other door  
Oh, no more silence  
Don't kill this thing we got called love  
Just searching for the perfect drug

When love comes calling  
Don't look back  
When love comes calling  
Don't look away

When love comes calling  
Don't look back  
When love comes calling  
Don't look away

And I'm standing over here  
Watching you over there  
Smiling, happy, unaware  
Oh, life is spinning round  
You're going underground  
Forgetting who we were  
Let's try and keep it  
Just one more day

When love comes calling  
Don't look back  
When love comes calling  
Don't look away

When love comes calling  
Don't look back  
When love comes calling  
Don't look away

You take your love  
And throw it all around  
Like it's nothing special

Just a sound

Let me say one more thing  
I don't think you realize  
That a day is like a year sometime

When love comes calling  
Don't look back  
When love comes calling  
Don't look away

When love comes calling  
Don't look back  
When love comes calling  
Don't look away

When love comes calling  
Don't look back  
When love comes calling  
Don't look away

When love comes calling  
Don't look back  
When love comes calling  
Don't look away
