There's a war going down between my brothers tonight
I don't want no war going down tonight

Civilization ha I call it as I see it
I call it bullshit you know I still cannot believe it
Our evolution now has gone the way of hate
A world evolved resolved in this stupid fate

Stop this... war!

All so different yeah I say were all the same
All caught you know in the division game
Self destruction fast impending like a bullet
No one can stop it once its fired no one can control it

A final word, wait it's not a call to action
We ain't no sect, no this ain't no fucking faction
Unity, unity you've heard it all before
This time its not exclusive we want to stop a war

Unity as one stand together
Unity evolutions gonna come
