I'm just the same as you
I could be the same age too
Listen to the same music you do
Everyday

No matter what separates us
The same stars we see at night
No matter what suffers against us
Still gonna have dreams burning bright

I believe we fear what we don't know,
we can be our own enemy
But if we concord and
If you took my hand
I see a girl you see a man

Everybody has the same dream
A dream in their heart
Get a chance to make a life
Love somebody they want
Open your eyes we're all the same
We've all been scared
So let's sing together now
Na na na na
In this Universal Prayer

Oh oh â€¦ na na na na

I see the smoking light
That complicates a simple life
I'm here and you are there
Miles away

All you gotta do is believe
That anything you want you can reach
There's no limit to what we could be
So open your mind
And set yourself free

I believe we fear what we don't know,
we can be our own enemy
But if we concord and

If you took my hand
I see a girl you see a man

Everybody has the same dream
A dream in their heart
Get a chance to make a life
Love somebody they want
Open your eyes we're all the same
We've all been scared
So let's sing together now
Na na na na
In this Universal Prayer

And if you say that I'm naive
That I don't understand the world at all
You might be right but it seems to me
That we've come too far to fall

Cause I believe that fears
I try to save our souls
And hardest time will come
And all this pain will go
So try to understand
The precious things I've said
Every woman every man

Oh oh na na na na

Everybody has the same dream
A dream in their heart
Get a chance to make a life
Love somebody they want
Open your eyes we're all the same
We've all been scared
So let's sing together now
Na na na na
In this Universal Prayer

Everybody has the same dream
A dream in their heart
Get a chance to make a life
Love somebody they want
Open your eyes we're all the same
We've all been scared
So let's sing together now
Na na na na
In this Universal Prayer

Oh oh na na na na
