Another friend is leaving town
and I don't wanna be the only one

Gothenburg has stolen some of you
Go find yourself, but don't forget
to call me so time

Lisa said: "I can't stay, this place is dead"
I was shaken ... ?

My computer is my only friend,
she won't go away
I turn her on and everybody's gone
everybody's gone

My love she ouldn't stay
she took you back and roll away
I tried to catch her but my (?)
are tied to eachother, she's gone
