I got home  
another night alone  
maybe I should call you up  
baby i was wrong.

Such a fool  
couldnt see  
was right in front of me  
why did I leave?

I was wrong  
wanted to be alone  
i guess i never really god it  
but now i know.

It's not about me always getting my way  
It's not about always looking for a change  
i figured it out the second i walked away (walked away)

It's all about the little things  
all about discovering  
all about the way you got me  
It's all about the way i fell when you came around  
and they way you picked me up hen i was down.  
Cause it's all about the little things  
all about remembering  
all about the way it used to be  
You see it's all about the little things  
how i miss the little things.

I take a ride  
gotta get outside  
something....  
where are you?  
could you be feeling the same as me

It's not about me needing any more space girl  
It's not about and everything will be okay  
I figured it out but then it was just too late

Cause It's all about the little things  
all about discovering

all about the way you got me  
It's all about the way i fell when you came around  
and they way you picked me up hen i was down.  
Cause it's all about the little things  
all about remembering  
all about the way it used to be  
You see it's all about the little things  
how i miss the little things (how i miss the little things)

I should be getting over it over  
thought i wouldnt give a but look at me  
now im such a wreck over  
cause i couldnt see the big picture  
no no no no  
cause i couldnt see the big picture  
no no no no ãfÃ,Ã,Ã½hhh  
hey  
and I just couldnt see it

It's all about the little things  
all about discovering  
all about the way you got me  
It's all about the way i fell when you came around (you  
came around)  
and they way you picked me up hen i was down.  
Cause it's all about the little things  
all about remembering  
all about the way it used to be (its all about the way )  
You see it's all about the little things  
how i miss the little things. (how it used to be girl)

It's all about the little things  
all about discovering (the little things yeah)  
all about the way you got me  
It's all about the way i fell when you came around  
and they way you picked me up hen i was down. (and i  
just couldnt see it)  
Cause it's all about the little things  
all about remembering  
all about the way it used to be  
You see it's all about the little things  
how i miss the little things.

no no, no no.  
how i miss those little things  
all about the little things  
said it's all about the little things  
how i miss the little things
