"Get Lonely"

I will rise up early and dress myself up nice
and I will leave the house and check the deadlock
twice.
and I will find a crowd and blend in for a minute
and I will try to find a little comfort in it.
and I will get lonely and gasp for air.
and send your name up from my lips like a signal flare.

and I will go downtown, stand in the shadows of the
buildings
and button up my coat, trying to stay strong, spirit
willing.
and I will come back home, maybe call some friends,
maybe paint some pictures,
it all depends.
and I will get lonely and gasp for air.
and look up at the high windows, and see your face up
there.
